Portfolio: <https://anjanashreya.github.io/anjana-shreya-portfolio/>

Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, ViteJS, Redux Toolkit, Material UI

Real-time & Data: WebSockets, GraphQL, Highcharts

Backend (Exposure): Node.js, Express.js, MongoDB

Testing and Tools: Jest, React Testing Library, Git, GitHub, Chrome DevTools, Figma, Mixpanel, Postman

Work Experience

Hivel

June 2025 – March 2026

Role – Frontend Developer

- Built real-time analytics dashboards using React, GraphQL, WebSockets and Highcharts for monitoring live operational metrics.
- Implemented efficient state management using Redux Toolkit (RTK Query) for scalable application flows.
- Integrated GraphQL APIs, REST APIs, and WebSockets for real-time data synchronization
- Wrote and maintained test cases to ensure application reliability and stability.
- Debugged and resolved complex issues in production systems. Developed and optimized interactive visualizations for large datasets, improving usability and performance.
- Contributed to complex, real-time interactive features including chatbot workflows and configuration-driven systems impacting overall application behavior.

Edgeforce Solutions

Jun 2024 – Sept 2024, Jan 2025 – May 2025

Role - Frontend Intern

- Built responsive and high-performance frontend applications using React, focusing on usability and smooth user experience
- Developed and visualized **real-time sensor data systems**, processing live data from AWS-based systems.
- Implemented data processing and event-detection logic for wearable-based tracking systems (timing, activity detection, user-device mapping)
- Integrated frontend with backend services using REST APIs, with exposure to Node.js, MongoDB, and AWS serverless (Lambda, DynamoDB, S3)

Suvidha Foundation

June 2024 – July 2024

Role - Web Developer Intern

Made a clone of the official Suvidha Foundation website while interning as a web developer with

HTML, CSS and Javascript.

Projects

Blog Platform (MERN Stack)

Feb 2025 – Apr 2025

- Developed a full-stack blog platform using MongoDB, Express.js, React.js, and Node.js.

- Implemented user authentication, blog submission workflows, and content verification features.
- Built responsive interfaces and integrated REST APIs for content management.

Employee Management and Monitoring System

Jul 2024 – Aug 2024

- Developed a centralized employee management platform for workforce monitoring and administration.
- Built responsive dashboards for employee tracking and performance management.
- Integrated backend services and database operations for secure data handling.

AI-Powered Chatbot Platform

May 2024 – Jun 2024

- Developed a full-stack AI chatbot using React, Node.js, Express, and Gemini APIs.
- Implemented JWT authentication, chat history management, and AI-powered conversational responses.
- Designed and deployed a responsive web application with secure backend integration.
